The following schedule of rates and charges shall apply provided, however, the Company shall not charge any rate or charge less than the minimum nor greater than the maximum; except that the Company, during any limited promotional periods, may suspend rates and charges. The Company shall notify the subscriber and the Department of Public Utility Control at least thirty (30) days prior to the effective date of any rate or charge (effective rate).

The effective rate is that rate in effect within the minimum-maximum schedule of rates. For cellular numbers and usage, the effective rate of the discount category is charged to all subscribers in the same discount category.

- c. The minimum usage charge on each completed call is one (1) minute. Each fraction of a minute thereafter is rounded up to the next thirty (30) or sixty (60) seconds for billing purposes in accordance with the effective rates on file with the Department of Public Utility Control.
- d. When a connection is established in one rate period and ends in another, the rate in effect for each period applies to the portion of the usage occurring within each rate period.
- e. A mobile originated call which does not complete and has less than one minute of usage is classified as an attempt and may incur an Attempt Charge as set for in B.4.b. Such incomplete calls exceeding one minute of usage will be billed as completed calls.
- f. A call placed to a cellular mobile radio unit which is answered employing the Call Waiting or Call Forwarding feature and has thirty (30) seconds or less of usage will incur an Initial Period Charge. Such calls having greater than thirty (30) seconds of usage will be billed as completed calls.

Quantity of Cellular Numbers Activated Band		Service Discount (Applied to Total Cellular Number and Usage Charges)			
		Period			
		1 Yr.		2 Yrs.	
		Min.	Max.	Min.	Max.

E	2,501- 5,000				
F	5,001-10,000				
G	10,001-20,000				
H	Over 20,000				

The credited discount will be based on the Band and Period selected and applied to the subscriber's total monthly bill for cellular numbers and usage.

The subscriber may reestablish or terminate the Service Discount after expiration of the Period selected. If termination occurs prior to the expiration of the Period selected, the Service Discount is deemed unearned and the amount of charges discounted during the Period is due, plus interest at the rate described in A.2.f.

The discount difference between the Bands, previously credited, plus interest at the rate described in A.2.f. will be debited to the subscriber's monthly bill.
